# Geotab GoAnalytics

Transforming data into safer driving

GoAnalytics is designed to supercharge your existing Geotab experience by seamlessly integrating multiple data sources to provide fleets with instant, actionable insights.

Whether you're monitoring a single location or the entire fleet, GoAnalytics allows you to identify key events and easily pinpoint the specific drivers involved.

The built-in coaching module promotes manager-driver engagement, fostering accountability and strengthening safety culture across the organization.

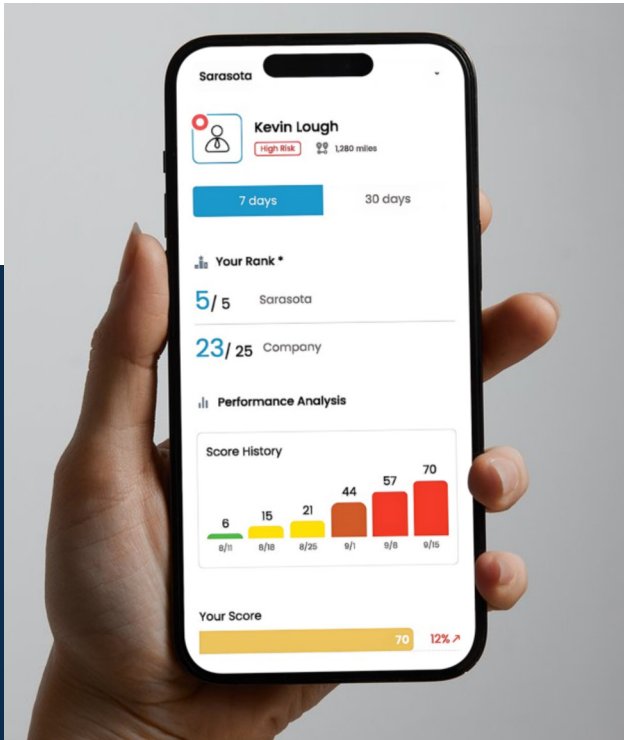

All-in-one data

GoAnalytics takes Geotab's data capabilities to the next level by integrating telematics, video, and vehicle diagnostics into a single, comprehensive platform, providing a holistic view of operations.

Interactive dashboards

GoAnalytics offers fully customizable dashboards tailored to spotlight key areas of focus for your fleet, including data trends across any time frame.

GoAnalytics Solutions

With **GoAnalytics Drive App integration**, your team can now track their driving performance, stay proactive about potential risks, and see how they rank within the company and their designated groups. They can also focus on the key areas that need improvement to enhance their driving performance.

Scores you will understand

GoAnalytics Safety Score provides you with a continuous flow of events and alerts, delivering a comprehensive view of driver performance.

Quickly identify risky drivers

Fully customizable dashboards provide you with a clear, detailed view of driver performance, enabling you to swiftly and effortlessly identify both top performers and those who may need additional coaching.

Optimize fleet maintenance

Geotab, the industry leader in decoding engine diagnostic codes, takes fleet management to the next level with GoAnalytics Preventative Maintenance.

Maximize efficiency

The Compliance & Utilization Report empowers fleet managers to identify underutilized assets that can potentially be redeployed to other locations. It also offers the option to download detailed reports for an in-depth fleet analysis.

About Eagle Wireless

Since 2006, Eagle Wireless is your single-source vendor for the very best solutions to help you manage your mobile workforce. These solutions include Vehicle and Asset Tracking, Dash Cameras, as well as Routing, Dispatching, and Compliance tools to streamline your business operations and improve efficiency.
