VisionTrack

The global leader in AI video telematics

VisionTrack provide connected cameras and AI-powered fleet management solutions to improve driver safety, reduce vehicle and insurance costs, and better operational efficiency for commercial fleets of any size and across any industry.

Their unique approach is helping tackle some of the most complex road safety challenges faced by the fleet, transportation and insurance sectors, providing the operational insight, business intelligence and enriched vehicle data needed to make strategic mobility decisions.

Intelligent fleet solutions

VisionTrack protects drivers, other road users and corporate reputation, while combating fraud and streamlining claims management.

Factory fit and finish

Factory-fit and aftermarket solutions for OEMs, dealerships, leasing companies and hire specialists, with industry-focused IT, training, marketing and after-sales support.

Video-enabled tech solutions

Complementary video-enabled technology solutions for vehicle tracking, telematics, value-added reseller (VAR) and business mobility partners.

VisionTrack is driving innovative change with Autonomise.ai

powered by AUTONOMISE.AI

Autonomise.ai has been developed as the most advanced video-enabled telematics solution for the fleet, road transport and insurance sectors. This multi-award winning Internet of Things (IoT) platform leverages extensive real-world data using finely-tuned algorithms, analytics and computer vision models to unlock knowledge and continually evolve.

Award-winning IoT

Autonomise.ai collects, processes and analyses real-time video and data from over 115,000 connected camera devices to generate concise and actionable insights.

Technology leadership

VisionTrack is transforming and shaping video telematics, delivering sophisticated and industry-leading innovations. Autonomise.ai is at the forefront of the marketplace and is designed for the future of connected vehicle technology.

Aux camera support

Autonomise.ai is processing on average 3.5 million driver miles every day, equating to travelling the entire UK road network 14 times over. This gives unique insight into vehicle journeys, traffic levels and driver behavior.

About Eagle Wireless

Since 2006, Eagle Wireless is your single-source vendor for the very best solutions to help you manage your mobile workforce. These solutions include Vehicle and Asset Tracking, Dash Cameras, as well as Routing, Dispatching, and Compliance tools to streamline your business operations and improve efficiency. We leverage technology to help you reduce risk, improve efficiency, and increase your bottom line.
